If containers become heated, over pressure with release of combustible material and even explosion may occur. To avoid this, they should be kept cool by spraying with water from a safe distance.

06. ACCIDENTAL RELEASE MEASURES

Inhalation of high-odour materials may cause discomfort or nausea and should be avoided by providing good ventilation during containment and disposal.

In case of impossibility of this and when particularly when substances having exposure standards are present the use of an organic vapour respirator is recommended.

Remove ignition sources and provide proper ventilation.

Wash the affected area with detergent and water.

Comply with local regulations for waste disposal.
